Legal Uncertainty

Dear Ladies and Gentlemen, dear President of France, Mr. Emmanuel Macron,

We hereby deliver a copy of our letter to the German government. In this letter we pointed out that this government or administration has no legitimacy.

As a member of the victorious powers of the Second World War, you organized the administration of Germany together with the other victorious powers.

The victorious powers falsely deceived the German people, particularly West Germany, into being sovereign and having a democracy. In truth, the victorious powers have retained control of Germany.

After 1990, legal changes were made in Germany that made the German legal system even more obsolete.

At present the German government is going to ignore all legality and to do immeasurable damage to the German people and to the world in the name of the German people.

As the victorious power, you are now responsible for this damage jointly with the other victorious powers.

We expect France to do what is necessary to prevent this illegitimate government from causing further damage!

We do not act alone in our interests. We stand here for all life on this earth, for plants, animals and humans. We stand for the one who created plants, animals and humans with love and by love.

With best regards

Uli Sommer signing for myself and on behalf on Jens Gordon Gerbracht, Jeschua
