## **Legal Uncertainty**

Dear Ladies and Gentlemen, dear President of Russia, Mr. Wladimir Putin,

We hereby deliver a copy of our letter to the German government.

In this letter we pointed out that this government or administration has no legitimacy. As a member of the victorious powers of the Second World War, you organized the administration of Germany together with the other victorious powers. The victorious powers falsely deceived the German people, particularly West Germany, into being sovereign and having a democracy. In truth, the victorious powers have retained control of Germany. After 1990, legal changes were made in Germany that made the German legal system even more obsolete.

We consider all human-made "legal systems" to be fundamentally impermissible from a larger perspective.

For ourselves we rely on the universal right to life and on the universal natives right.

In a world with differently powerful and violent people and in a world with money, factories, cities, high technology and civilization, anyway human-made legal systems can obtain a limited justification for themselves if they are applied in the same way without distinction between humans and if they protect humans from being exploited, from any attacks, crimes and injury and when they are granting people as much freedom as is possible within the framework of a peaceful coexistence.

At present, however, the German government is going to ignore all legality and they do immeasurable damage to the German people and to other peoples in the world in the name of the German people.

You probably would know what we are talking about even without further explanation. Nonetheless, we would like to mention a few examples to represent many other things:

- Restriction of basic rights and the exercise of coercion and arbitrariness, violation of physical integrity in the context of compulsory masking, tests under duress and de facto forced vaccinations on defenseless seniors and compulsion to vaccinate many other people, with a vaccination that represents an interference in our genetics;

- Arbitrary restriction of the freedom of movement and freedom of travel, curfews, visiting bans, complete isolation of seniors, psychological warfare against all people and especially against children;
- Prohibitions on the exercise of professions, prohibitions on free trade;
- censorship, prohibition of the free expression of opinions, prohibition of gatherings, creating discord among the people, violent abolition on peaceful protests;
- Support for terrorist organizations in Germany and abroad;
- Participation in wars of aggression and the delivery of weapons and support for wars of aggression, often wars of aggression by Islamists
- Destroying one's own economy through support for foreign producers and investors, through legislation and infiltration with foreign agents
- Negotiating "free trade agreements" to damage the environment, health and business and doing damage to sovereignty and justice;
- Creation of discord with geographical neighbors and with economic partners such as Russia
- Destroying the environment by promoting maximum waste of raw materials, promoting pesticides and genetic engineering in food;
- Destruction of health through the prohibition of healthy food and remedies and through the prescribed use of toxic "remedies" and "foods": -

The list could go on and on ...

As the victorious power, you are now responsible for this damage, jointly with the other victorious powers.

We expect Russia to do what is necessary to prevent this illegitimate government from causing further damage!

We do not act alone in our interests. We stand here for all life on this earth, for plants, animals and humans. We stand for the one who created plants, animals and people with love and by love.

Best regards

Uli Sommer signing for myself and on behalf on Jens Gordon Gerbracht, Jeschua
